water distribution *Avena fatua* seed coat modification light quality dormant and non-dormant seeds 683
Wheat leaf
cell extension gibberellin *Rht3* dwarfing gene temperature 963
Wheat roots
plasma membrane Na^+ currents non-selective cation channel salinity 459
Wheat seed dormancy
inheritance mutant abscisic acid 1415
White clover
legume nodules carbohydrate metabolism amino acid metabolism enzymes 895
Whole cell
light patch-clamp plasma membrane tobacco 1623
Wound-induced proteins
Lycopersicon esculentum abscission zone ethylene tomato 1223
Wound phloem
compatibility/incompatibility *in vitro*-heterografts phloem transport ([^{14}C]-sucrose, carboxyfluorescein) 289
Xanthophyll cycle
carotenoids chlorophyll fluorescence photosynthesis photoinhibition photoprotection 1289
Xanthophylls
chlorophyll fluorescence pigments *Quercus suber* thermal dissipation 1667
Xylan
xyloglucan Golgi apparatus hemicellulose biosynthesis 1209
Xylem
phloem transport P deficiency *Ricinus communis* L. nitrate nitrate reduction phosphate phosphate assimilation partitioning 75
Xylem ABA
water deficits root-to-shoot communication *Prunus persica* L. stomata 1727
Xylem embolism
hydraulic conductance *Hymenoclea salsola* *Ambrosia dumosa* cavitation 1323
TDR dielectric constant water content *Pinus sylvestris* 813
Herbaspirillum Sorghum bicolor nitrogen fixation endophyte 785
Xylem parenchyma
barley G-proteins long-distance signalling root:shoot communication 441
Xylem pressure probe
osmotic stress reflection coefficient transpiration diurnal changes 2045
pressure bomb Cohesion-Tension theory cavitation embolism 1753
Xylem pressure
Zea mays extension growth hydraulic conductivity root development (xylem, endodermis) transport (water and solute) turgor pressure water stress 985
Xylem tension
soil–plant–atmosphere continuum water relations 1
Xylem transport
mineral nutrition ABA shoot-to-root signal *Zea mays* seminal roots plant development 1229
Xylem-delivered ABA
maize abscisic acid ABA ABA export ABA metabolism 1557
Xyloglucan
cell expansion cell wall hemicellulose sloughing 297
Golgi apparatus hemicellulose biosynthesis xylan 1209
Yeast
cDNA library screening patch clamp analysis plant ion channels 405
Yeast two-hybrid screening
Arabidopsis thaliana cell cycle cyclin cyclin-dependent kinases 2113
Yield
carbon dioxide ozone spring wheat (cv. Minaret) leaf damage tiller 113
Yield suppression
stomatal limitation elevated CO_2 O_3 flux *Glycine max* 307
Zea mays
antioxidant enzymes differential chilling sensitivity maize soluble carbohydrates 1105
cadmium sensitivity tissue fractions stress *Pisum sativum* 123
extension growth hydraulic conductivity root development (xylem, endodermis) transport (water and solute) turgor pressure water stress xylem pressure 985
NADP-malic enzyme *Triticum aestivum* 799
polypeptides mRNA proteins ion transporter 857
root cap frictional resistance root penetration cell sloughing 885
seminal roots plant development xylem transport mineral nutrition ABA shoot-to-root signal 1229
viviparous mutant ABA carotenoids chlorophyll synthesis 1259
Zeaxanthin epoxidase
tomato ABA biosynthesis 1749
Zero turgor
plasmolysis concentration gradient K^+ channels Cl^- channels *Chara australis* *I/V* analysis 1383
Zinc efficiency
chlorsulfuron genotypes nutrient uptake *Triticum* sp. 927
chlorsulfuron genotypes *Triticum* sp. uptake kinetics 935
Zn
Armeria maritima growth tests heavy-metal resistance synthetic ion-exchange resins 1959
Zygotic embryogenesis
development marker mutant somatic embryogenesis 1493
